

# CY54/74FCT245T

## 8-Bit Transceiver

### Features

- Function, pinout, and drive compatible with FCT, F logic
- FCT-C speed at 4.1 ns max. (Com'l), FCT-A speed at 4.6 ns max. (Com'l)
- Reduced  $V_{OH}$  (typically = 3.3V) versions of equivalent FCT functions
- Edge-rate control circuitry for significantly improved noise characteristics
- Power-off disable feature
- ESD > 2000V

- Matched rise and fall times
- Fully compatible with TTL input and output logic levels
- Sink current 64 mA (Com'l), 48 mA (Mil)  
Source current 32 mA (Com'l), 12 mA (Mil)

### Functional Description

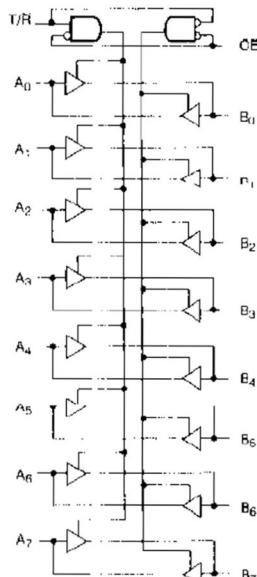

The FCT245T contains eight non-inverting bidirectional buffers with three-state outputs and is intended for bus oriented applications. For the

FCT245T, current sinking capability is 64 mA at the A and B ports.

The Transmit/Receiver (T/R) input determines the direction of data flow through bidirectional transceiver. Transmit (Active HIGH) enables data from A ports to B ports. The output enable (OE), when HIGH, disables both the A and B ports by putting them in a High Z condition.

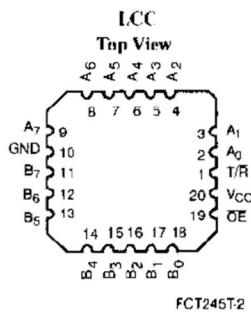

The outputs are designed with a power-off disable feature to allow for live insertion of boards.

**Capacitance<sup>[6]</sup>**

| Parameter        | Description        | Typ. <sup>[5]</sup> | Max. | Unit |
|------------------|--------------------|---------------------|------|------|
| C <sub>IN</sub>  | Input Capacitance  | 5                   | 10   | pF   |
| C <sub>OUT</sub> | Output Capacitance | 9                   | 12   | pF   |

**Notes:**

2. Unless otherwise noted, these limits are over the operating free air temperature range.
3. Unused inputs must always be connected to an appropriate logic voltage level, preferably either V<sub>CC</sub> or ground.
4. T<sub>A</sub> is the "instant on" case temperature.
5. Typical values are at V<sub>CC</sub>= $5.0\text{V}$ , T<sub>A</sub>= $+25^{\circ}\text{C}$  ambient.
6. This parameter is guaranteed but not tested.
7. Not more than one output should be shorted at a time. Duration of short should not exceed one second. The use of high-speed test apparatus and/or sample and hold techniques are preferable in order to minimize internal chip heating and more accurately reflect operational values. Otherwise prolonged shorting of a high output may raise the chip temperature well above normal and thereby cause invalid readings in other parametric tests. In any sequence of parameter tests, I<sub>OS</sub> tests should be performed last.

**Switching Characteristics Over the Operating Range**

| Parameter                            | Description                                | FCT245CT |      |            |      | FCT245DT   |      | Unit | Fig.<br>No.[13] |  |  |
|--------------------------------------|--|----------|------|------------|------|------------|------|------|-----------------|--|--|
|                                      |  | Military |      | Commercial |      | Commercial |      |      |                 |  |  |
|                                      |  | Min.[12] | Max. | Min.[12]   | Max. | Min.[12]   | Max. |      |                 |  |  |
| t <sub>pH</sub><br>t <sub>pH</sub>   | Propagation Delay<br>A to B or B to A      | 1.5      | 4.5  | 1.5        | 4.1  | 1.5        | 3.8  | ns   | 1, 3            |  |  |
| t <sub>pZH</sub><br>t <sub>pZL</sub> | Output Enable Time<br>OE or T/R to A or B  | 1.5      | 6.2  | 1.5        | 5.8  | 1.5        | 5.0  | ns   | 1, 7, 8         |  |  |
| t <sub>pHZ</sub><br>t <sub>pZL</sub> | Output Disable Time<br>OE or T/R to A or B | 1.5      | 5.2  | 1.5        | 4.8  | 1.5        | 4.3  | ns   | 1, 7, 8         |  |  |

Shaded areas contain preliminary information.

**Notes:**

12. Minimum limits are guaranteed but not tested on Propagation Delays.

13. See "Parameter Measurement Information" in the General Information Section.

**CY54/74FCT245T**

**Ordering Information**

| Speed<br>(ns) | Ordering Code   | Package<br>Name | Package Type                    | Operating<br>Range |
|---------------|-----------------|-----------------|---------------------------------|--------------------|
| 3.8           | CY74FCT245DTQC  | Q5              | 20-Lead (150-Mil) QSOP          | Commercial         |
|               | CY74FCT245DTSOC | S5              | 20-Lead (300-Mil) Molded SOIC   |                    |
| 4.1           | CY74FCT245CTPC  | P5              | 20-Lead (300-Mil) Molded DIP    | Commercial         |
|               | CY74FCT245CTOC  | O5              | 20-Lead (150-Mil) OSOP          |                    |
|               | CY74FCT245CTSOC | S5              | 20-Lead (300-Mil) Molded SOIC   |                    |
| 4.5           | CY54FCT245CTDMB | D6              | 20-Lead (300-Mil) CerDIP        | Military           |
|               | CY54FCT245CTLMB | L61             | 20-Square Leadless Chip Carrier |                    |
| 4.6           | CY74FCT245ATPC  | P5              | 20-Lead (300-Mil) Molded DIP    | Commercial         |
