

CD40160BM/CD40160BC Decade Counter with Asynchronous Clear **CD40161BM/CD40161BC Binary Counter with Asynchronous Clear** **CD40162BM/CD40162BC Decade Counter with Synchronous Clear** **CD40163BM/CD40163BC Binary Counter with Synchronous Clear**

General Description

These (synchronous presettable up) counters are monolithic complementary MOS (CMOS) integrated circuits constructed with N- and P-channel enhancement mode transistors. They feature an internal carry look-ahead for fast counting schemes and for cascading packages without additional gating.

A low level at the load input disables counting and causes the outputs to agree with the data input after the next positive clock edge. The clear function for the CD40162B and CD40163B is synchronous and a low level at the clear input sets all four outputs low after the next positive clock edge. The clear function for the CD40160B and CD40161B is asynchronous and a low level at the clear input sets all four outputs low, regardless of the state of the clock.

Counting is enabled when both count enable inputs are high. Input T is fed forward to also enable the carry out. The carry output is a positive pulse with a duration approximately equal to the positive portion of Q_A and can

be used to enable successive cascaded stages. Logic transitions at the enable P or T inputs can occur when the clock is high or low.

Features

- Wide supply voltage range 3.0V to 15V
- High noise immunity $0.45 V_{DD}$ (typ.)
- Low power TTL compatibility fan out of 2 driving 74L or 1 driving 74LS
- Internal look-ahead for fast counting schemes
- Carry output for N-bit cascading
- Load control line
- Synchronously programmable
- Equivalent to MC14160B, MC14161B, MC14162B, MC14163B
- Equivalent to MM74C160, MM74C161, MM74C162, MM74C163

Connection Diagram

Absolute Maximum Ratings

(Notes 1 and 2)

V_{DD} dc Supply Voltage	-0.5 to +18 VDC
V_{IN} Input Voltage	-0.5 to V_{DD} +0.5 VDC
T_S Storage Temperature Range	-65°C to +150°C
P_D Package Dissipation	500 mW
T_L Lead Temperature (Soldering, 10 seconds)	300°C

Recommended Operating Conditions

(Note 2)

V_{DD} dc Supply Voltage	3 to 15 VDC
V_{IN} Input Voltage	0 to V_{DD} VDC
T_A Operating Temperature Range	-55°C to +125°C
CD40XXxBM	-40°C to +85°C
CD40XXxBC

Note 1: "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed; they are not meant to imply that the devices should be operated at these limits. The table of "Recommended Operating Conditions" and "Electrical Characteristics" provides conditions for actual device operation.

Note 2: V_{SS} = 0V unless otherwise specified.

Note 3: C_{PD} determines the no load ac power consumption of any CMOS device. For complete explanation see 54C/74C Family Characteristics application note, AN-80.

AC Electrical Characteristics T_A = 25°C, C_L = 50 pF, R_L = 200k, unless otherwise specified.
